

# Reclaim Your Life

## Work, play, and live without pain today!

### Avoid doctor visits

A 10 to 30-minute-session results in pain relief that can last for days or weeks.

### Target Your Pain and Get Relief

No more pharmaceutical drugs that affect the entire body, cause problems thinking, and are possibly addictive, electrotherapy can be used to provide pain relief right at the site.

### Supports Surgical Recovery

Electrotherapy aids in recovery of post-surgical discomfort or pain resulting from an injury.

### A setting for almost every type of pain

The WellnessPro+® offers a wide variety of frequencies to effectively treat your pain. Developed by top scientists, FDA-cleared, and trusted by doctors globally.

The Wellness Pro Plus® includes codes for different body parts and ailments that you can input. It offers versatility, as it can be used with handheld rods or patches, both delivering electrotherapy. Your Wellness Pro Plus® package includes a code book, all required equipment, and comprehensive instructions.

# Drug-free pain relief

The WellnessPro Plus triggers our body's natural wellness properties, with over a million frequencies to choose from. The WellnessPro Plus offers a treatment for numerous pain-related issues.

## **Electrotherapy—How it works**

The energy source for the electricity created in the human body is chemical and has to do with the composition of the atoms and molecules present. Everything we take into our bodies, oxygen, food, supplements has a specific electrical charge. When these molecules bind together they create chemicals that create electrical energy.

Electricity enables information to circulate in the body, either healing our bodies or distributing pain information to the brain. Electrotherapy interferes with the pain information by pulsating electrical waves that interfere with the transmission of pain signals.

Our nervous system is composed of the central nervous system and the peripheral nervous system. The brain and spinal cord comprise the central nervous system, and our sensory and motor nerves make up the peripheral nervous system,

Nerves send information about what is happening in our environment to the brain via the spinal cord. The brain then sends information back to our nerves, helping us to perform actions in response. When the information sent to the brain is pain, we suffer the consequences.

The Wellness Pro Plus®, using a wide variety of codes to create signals with either TENS or microcurrent interrupts the signals sent to the brain, thus giving the painful part of the body a chance to heal. When our perception is of pain, we automatically clench our body around the painful area, thus not allowing it to heal.

The Wellness Pro Plus® sends healing messages with varying frequencies, wavelengths and intensities to our body along with the pain interruption.
